

e-learning

Online learning is the newest and most popular form of education of this era/modern time.

Online learning is education that takes place over the Internet. It is often referred to as “e-learning” among other terms. However, online learning is just one type of “distance learning” - the umbrella term for any learning that takes place across distance and not in a traditional classroom.

It is Internet-based course offered by Institute. In this course devices such as cellular phones, laptops/desktops are used with Internet facility.

An online education is preferred by individuals who can not join classroom learning programs (face to face learning programs) due to various reasons.

Online education has clearly become one of the most popular higher education alternatives. The continually improving reputation of online learning helped fuel its expansion, as initial skepticism faltered in the face of evidence showing that online learning can be just as effective as face-to-face education. Benefits of this exciting education to students are given below.

Benefits of Online Education:

Convenience and Flexibility: 24/7 access from any online computer; accommodates busy schedules; no commuting, no searching for parking.

Students have the freedom to juggle their careers and school because they aren't tied down to a fixed schedule. In a traditional classroom setting, class meeting times are set, and the student has no power over this, forcing them to work their schedules around these dates. Most people who choose online learning tend to have other commitments, and prefer this mode of learning as it gives them power over how they will delegate their time towards their different projects.

Reduced Costs: Online programs prove a more affordable option than traditional programs. Online courses offer less expensive because associated expenses always cost less.

It cost less due to a variety of reasons. For example, there is no cost for commuting. Assorted costs that are related to transport, such as fuel, parking, car maintenance, and public transportation costs don't affect the online student.

Enhanced Learning: Research shows increased depth of understanding and retention of course content; more meaningful discussions; emphasis on writing skills, technology skills, and life skills like time management, independence, and self-discipline.

Ability to Concentrate: Students can take more time to think and reflect before communicating; shy students tend to thrive online; anonymity of the online environment.

Some students even report better concentration in online classes due to the lack of classroom activity.

More Interaction: Increased student-to-teacher and student-to-student interaction and discussion; a more student-centered learning environment; less passive listening and more active learning; a greater sense of connectedness, synergy.

While contradictory evidence about the rate of online student participation versus participation in traditional courses exists, one thing remains certain: Online courses offer shy or more reticent students the opportunity to participate in class discussions more easily than face-to-face class sessions.

Innovative Teaching: Student-centered approaches; increased variety and creativity of learning activities; address different learning styles; changes and improvements can translate to on-ground courses as well

Continue in your profession: Students can take online courses while working, while in-between jobs, or while taking time to raise a family.

Even if someone wants to join course, it may not mean they want to leave their current job. For most students today, increasing college/institute costs mandate that some students continue working while in school. The previously mentioned flexibility of online programs enable students to keep working while also pursuing academic credentials.

Avoid commuting: During snowstorms and thunderstorms colleges/institutes may cancel classes to avoid putting commuting students at risk of dangerous driving conditions and in case of any pandemic such as covid-19 government takes decision to lockdown where no public gathering and classroom classes are allowed. In these kind of situations rather than miss important class sessions, students in online courses can always "attend" by participating in discussion boards or chat sessions, turning in their work on time, and watching lectures or reading materials. Many students also find substantial savings on fuel costs with no commute for classes.
